Re: OHD 000 647 131 ←

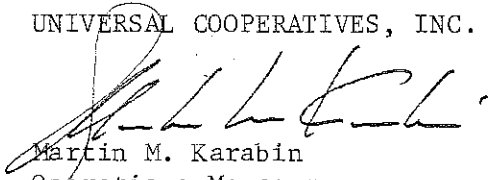

Dear Sir:

My letter dated November 3, 1988 described our efforts as generator to remove solid hazardous waste for off site disposal. At this time I wish to inform you that the waste described previously was disposed on November 8, 1988.

At this time we are in compliance with the generator 90 day on-site accumulation period. However, we are seeking approval for incineration of wastes restricted from land disposal and have submitted those requirements to the Chemical Waste Management. Depending on the length of that approval process, one to three 55 gallon size drums of waste may again exceed the 90 day accumulation limit. Should this occur, every precaution will be taken as before to insure that no possible hazard can occur to the environment nor to the employees.

Sincerely,

UNIVERSAL COOPERATIVES, INC.

Re: OHD000647131

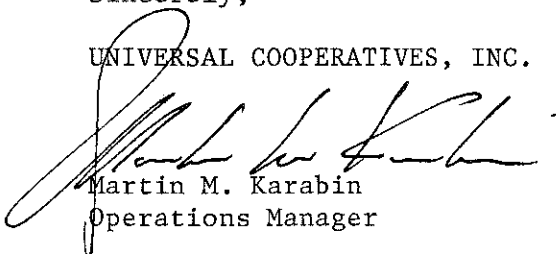

Dear Sir:

To comply with the provisions of 40 CFR Part 262, an extension of 30 days is hereby requested. The 90 day accumulation period expired on January 16, 1992.

The waste stream is F003, combustible liquid. Ross Incineration Services personnel telephoned to inform us of cancellation of their scheduled pick-up due to an unscheduled test run of their incinerator.

Sincerely,

UNIVERSAL COOPERATIVES, INC.

Re: OHD 000647131

Dear Sir:

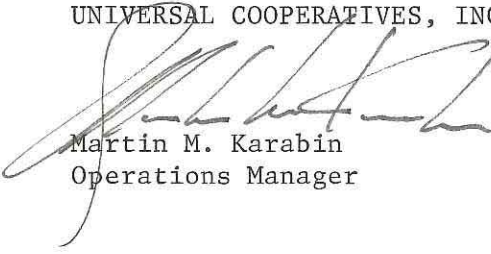

To comply with the provisions of 40 CFR Part 262, an extension of 30 days is hereby requested. The 90 day accumulation period expired on April 16, 1991.

Chemical Waste Management's Chicago incinerator has been shut down for over a month. This shut down placed an overload on their Trade Waste Incineration. Currently there is one 50 gallon fiber drum exceeding the 90 day period with another 9 such containers that may exceed the 90 day period during the next several weeks.

I have learned that the tests are underway at the Chicago incinerator, however, they have about a two month back log of stored material. However, efforts are underway to move waste through Trade Waste Incineration.

Sincerely,

UNIVERSAL COOPERATIVES, INC.

RE: Extension of Accumulation Time  
Universal Cooperatives, Inc.  
Napoleon, Ohio  
OHD 000 647 131

Dear Mr. Karabin:

This is in response to your January 17, 1989, letter which requested an extension of the 90-day generator accumulation period for the above-referenced facility. The extension request was submitted pursuant to 40 CFR 262.34(b), because three drums have exceeded the 90-day accumulation period.

The United States Environmental Protection Agency (U.S. EPA) has reviewed your request. It appears to be justified because a delay in shipment was encountered. This was due to pending preparation of final contractual agreements with Chemical Waste Management's Chicago incinerator. The U.S. EPA is granting a 30-day extension from the original 90-day accumulation date which expired January 4, 1989. The new deadline for removal of the waste is February 4, 1989.

If you have any questions pertaining to this extension, please contact Ms. Anita L. Boseman of my staff, at (312) 353-4734.

Sincerely,

Basil G. Constantelos, Director  
Waste Management Division

RE: Extension of Accumulation Time  
Universal Cooperatives, Inc.  
Napoleon, Ohio  
OHD 000 647 131

Dear Mr. Karabin:

Thank you for your letter of February 13, 1989, which requested a second extension of the 90-day generator accumulation period for the above-referenced facility. The extension request was submitted pursuant to 40 CFR 262.34(b), because five drums have exceeded the 90-day accumulation period.

The United States Environmental Protection Agency (U.S. EPA) has reviewed your request. It appears to be justified because a further delay in shipment of your waste was encountered. This was due to a shutdown at the Chemical Waste Management's Chicago incinerator that caused a temporary backlog in the material scheduled for incineration. The U.S. EPA is granting a second 30-day extension from the original 90-day accumulation date which expired on January 4, 1989. The new deadline for removal of the waste is March 6, 1989.

If you have any questions pertaining to this extension, please contact Mr. Daniel Patulski of my staff, at (312) 886-0656.

Sincerely yours,

Re: Extension of Accumulation Time

Dear Sir:

Your letter dated February 2, 1989 was received on February 6, 1989 in which a 30 day extension pursuant to 40 CFR 262.34b was granted. The new removal deadline given was February 4, 1989.

The contractual agreement with Chemical Waste Management's Chicago incinerator was signed on January 23, 1989 on receipt. However, after several attempts to schedule removal of the accumulated waste, I was first informed that the incinerator was down for repairs for several weeks, then that they would attempt to find a way to remove the waste on time, then finally that we are on the list for removal as soon as the incinerator can accept it. This activity has unfortunately caused my delay in requesting yet another 30 day extension.

The delay in the disposal of this solid hazardous waste is the result also of land disposal prohibition of the California Listed materials containing HOC's in excess of 1000 ppm. Every effort has been made to dispose of this waste in the proper manner. Under the circumstances, however, another 30 day extension is hereby requested.

There are now five - 55 gallon size metal drums that exceed the 90 day accumulation period. These drums are closed securely, stored within the plant, isolated from other stored materials, barricaded with identifying signs posted and with diking surrounding the storage area. We feel that no possible hazard can occur to the environment or the employees as a result of the precautions taken. The area is checked daily also.

Sincerely,

UNIVERSAL COOPERATIVES, INC.

  
Martin M. Karabin  
Operations Manager

Re: OHD 000647131

Dear Sir:

In compliance with the provisions of 40 CFR Parts 264 and 265, an extension of 30 days is hereby requested. The 90 day accumulation period expired on January 4, 1989, along with first 30 day extension expiring on February 4, 1989 and the second 30 day extension that will expire on March 6, 1989.

For the past approximately 45 days, this facility has been waiting for incineration facility to schedule disposal of the waste. We have been advised that we are on the incineration facilities priority listing, but specific date was not given.

Sincerely,

UNIVERSAL COOPERATIVES, INC.

SUMMARY

I asked Mr. Karabin the status of the hazardous waste being stored at his facility since the fall of 1988. The facility had been unable to dispose of its waste even after two 30 day extensions beyond the 90 day storage period. He stated the waste was shipped off site for incineration at the Waste Mgmt facility (SCA) in Chicago on March 28.

RE: Extension of Accumulation Time  
Universal Cooperatives, Inc.  
Napoleon, Ohio  
OHD 000 647 131

Dear Mr. Karabin:

This is in response to your February 28, 1989, letter which requested a third extension of the 90-day generator accumulation period for the above-referenced facility. The extension request was submitted pursuant to 40 CFR 262.34(b), because at least five drums of hazardous waste had exceeded the 90-day accumulation period.

The United States Environmental Protection Agency (U.S. EPA) has reviewed and determined that your request for a third extension be denied. The U.S. EPA requires that Universal Cooperatives, Inc., immediately remove the waste off-site to a permitted treatment, storage or disposal facility, or be held in violation of Subtitle C Section 3002 and 40 CFR 262.34. A copy of the hazardous waste manifest should be submitted to the U.S. EPA Regional Office, once the waste has been removed from the facility.

If Universal Cooperatives, Inc., is unable to ensure that it can consistently comply with the 90-day storage limitation of Section 262.34(a), then it should apply for a Resource Conservation and Recovery Act hazardous waste management permit that would allow for storage beyond the 90-day time period.

Please contact Mr. Daniel Patulski of my staff, at (312) 886-0656, if you have any questions in this matter.

Sincerely,

Basil G. Constantelos, Director  
Waste Management Division

Re: OHD 000647131

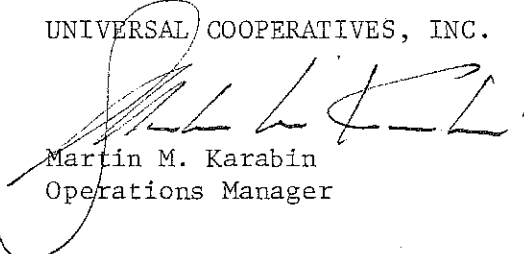

Dear Sir:

To comply with the provisions of 40 CFR Parts 264 and 265, an extension of 30 days is hereby requested. The 90 day generator accumulation period expired on January 4, 1989.

Due to the regulatory changes affecting land disposal of wastes, an application was submitted to Chemical Waste Management's Chicago incinerator for disposal of these wastes on November 14, 1988. I have just learned that this waste was accepted and is pending preparation of final contractual agreements. Currently, there are seven 55 gallon drums of such waste, but only three of these drums exceed the 90 day accumulation period.

Sincerely,

UNIVERSAL COOPERATIVES, INC.

Attention: RECRA Activities

Dear Sir:

OHAD000647131-1, TR

As the generator of hazardous waste, the 90 day accumulation period expired on December 2, 1987. To comply with the provision of 40CFR Parts 264 and 265, an extension of 30 days is being requested.

The circumstance leading to this condition is the discontinuance of accepting this plant's generated solid waste by the previously utilized disposal site. Applications were submitted to two other disposal facilities since learning of the unacceptance and one facility prior to that time. At this moment we await the approval by three facilities. That approval should be forthcoming within the next two weeks.

Sincerely,

UNIVERSAL COOPERATIVES, INC.

Martin M. Karabin  
Operations Manager

ACKNOWLEDGEMENT OF NOTIFICATION  
OF HAZARDOUS WASTE ACTIVITY  
(VERIFICATION)

This is to acknowledge that you have filed a Notification of Hazardous Waste Activity for the installation located at the address shown in the box below to comply with Section 3010 of the Resource Conservation and Recovery Act (RCRA). Your EPA Identification Number for that installation appears in the box below. The EPA Identification Number must be included on all shipping manifests for transporting hazardous wastes; on all Annual Reports that generators of hazardous waste, and owners and operators of hazardous waste treatment, storage and disposal facilities must file with EPA; on all applications for a Federal Hazardous Waste Permit; and other hazardous waste management reports and documents required under Subtitle C of RCRA.
